## Tools for Success

Topic: Leadership and Management (LM)

This session focuses on enterprise building and problem solving and will challenge participants to think through the context for moving their respective work forward. Do you have control of the next step? Do you have a plan to drive your work forward? Or put in simplest terms, does life happen to you or do you make things happen in life? No, this is not Tony Robbins lite but rather a set of tools and approaches to make you more effective in your work, and paradigms for you to advance your organizational mission. Come to this session if you want to gain additional insights on how to become more of an engine in driving your work forward.
